Experiment Number	1
Experiment Title	Build a Resume using HTML/CSS
Date of Experiment	07/01/2025
Date of Submission	13/01/2025

1. Objective:- The objective of building a resume using HTML/CSS is to showcase web development skills by creating a visually appealing and responsive design. It helps present personal and professional details in a clean, organized manner, reflecting creativity and attention to detail. The project serves as a practical way to refine coding skills while building a unique personal brand. Additionally, it enables interactive features and accessibility for a professional online presence.

2. Procedure:-

1. Plan the Layout: Decide the structure of the resume (e.g., header, sections like personal details, education, skills, experience). Sketch a rough design.
2. Create the HTML File: Use semantic HTML tags (<header>, <section>, <footer>) to structure content logically.
3. Style with CSS: Link a CSS file to the HTML and use CSS for layout, typography, colors, and spacing. Apply Flexbox or Grid for responsive design.
4. Add Interactivity: Include links to portfolio or LinkedIn and use hover effects for buttons or sections.
5. Test and Optimize: Ensure responsiveness using media queries and test for cross-browser compatibility.

3. Code:-

HTML:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>My Resume</title>
  <link rel="stylesheet" href="lab1.css">
</head>
<body>
  <div class="container">
```

```
